

Unpacking Checklist

Survived the utilities, packing and moving? Follow this plan and you'll be unpacked in no time!

- **Get a Head Start** – Start the packing process early for a more organized and stress-free process. If you finish early, relax, but better to have the time you need.
- **Inventory** – As items are unloaded and come through the door, it helps to cross them off the moving inventory. You can also direct the movers where to place items, saving you from moving them again later.
- **Appliances** – Get your appliances plugged in and turned on. Not only will they be in place and out of the way, but fridges can start cooling, microwaves are ready to heat a snack and washers are ready.
- **Start with Large Items** – We suggest placing large items like beds, wardrobes, sofa sets and book shelves first. This makes moving in boxes a breeze, with room to unpack.
- **Proper Box Placement** – If you followed our Prepacking Checklist, your boxes should be labeled. Now you can easily direct them to the correct room for faster unpacking.
- **Prioritize Unpacking** – We recommend unpacking the kitchen first, with that set up you'll be able to have a nice meal and energize. Next move to the bedrooms so they are ready for a good night sleep and recharged for the next day.
- **Unpacking Boxes** – Plan ahead to connect utilities at your new home and disconnect them after your move. Don't forget to get your deposits back also!
- **Removing Materials** – Last, you'll want to clear all of those boxes and packing materials from your home. If your community doesn't have a recycling area, your used boxes are welcome at Right Space where we will recycle them.

Start the day with a plan in hand for smooth settling after your move!
